SLABBINCK XTREME

Giza 45 katoen is de allerbeste katoenvezel die er bestaat. Giza katoen wordt alleen op geselecteerde gronden in de Nijlvallei in Egypte gekweekt en met de hand geplukt en verwerkt. De uiterst fijne, lange en gelijkmatige vezels geven een uniek zijdezacht gevoel en glans. Dit is de crème de la crème van het katoen.

Le coton Giza 45 est la meilleure fibre de coton qui existe. Le coton de Giza est cultivé sur des terres sélectionnées dans la vallée du Nil en Egypt et cueillies et transformées à la main. Les fibres extrêmement fines, longues et uniformes donnent une sensation et une brillance soyeuses uniques. C'est la crème de la crème du coton.

The Giza 45 cotton simply is the best cotton fiber that exists. Giza cotton is grown on selected grounds in the Nile valley and hand-picked and processed. The extremely fine, long and even fibers give a unique silky feeling and shine. This is the crème de la crème of the cotton.

Het FIBRAFINA® handelsmerk staat garant voor stoffen van superieure kwaliteit met een uitzonderlijke look & feel. Het verhaal van de FIBRAFINA® stoffen begint bij de zoektocht naar de allerbeste vezels die vervolgens met de grootste finesse verwerkt worden volgens de kunst van het Italiaans weven. Het unieke vakmanschap dat samensmelt met de onevenaarbare kwaliteit van de extra-long staple vezels creëert sublieme stoffen die zeer dicht geweven zijn, zijdezacht aanvoelen en een luxueuze glans geven.

SONATA voelt super zacht aan, maar is tegelijk ook crispy door de perkaal weving en heeft een 665 thread count.

SINFONIA geeft een weelderige glans met een ultrazacht gevoel dankzij de satijn weving met een 750 thread count.

FIBRAFINA®, marque déposée, propose des tissus d'une qualité hors du commun. Les tissus FIBRAFINA®, issus d'une recherche approfondie, ont pour objectif d'aboutir à la meilleure des matières premières qui puisse être tissée sur les métiers Italiens. Le savoir-faire mêlé à une qualité sans équivalent de ces fibres extra-longues permet d'obtenir un coton à la structure très dense, au toucher soyeux et à l'aspect chatoyant.

SONATA est une Percale de 260 fils/cm² alliant la douceur à une irrésistible sensation de fraîcheur.

SINFONIA est un Satin de 295 fils/cm² à la douceur extrême et à l'aspect chic et soyeux.

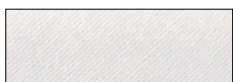

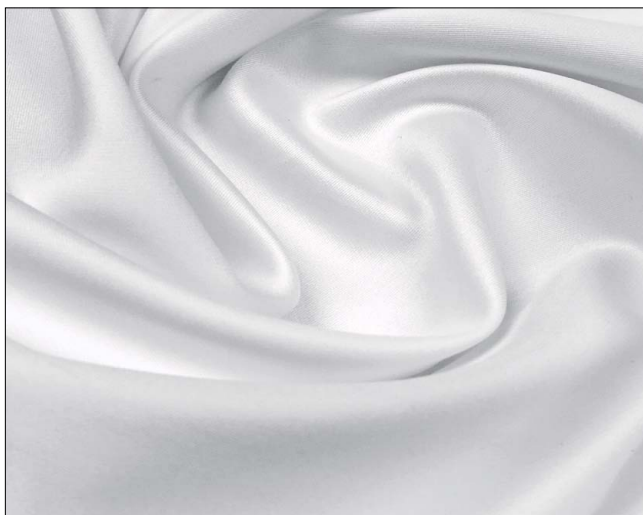

The FIBRAFINA® trademark introduces fabrics of the highest quality offering an exceptional performance. FIBRAFINA® fabrics begin their journey with experts searching for the best raw materials which is then processed by the art of Italian weaving. The unique craftsmanship intertwined with the unequalled quality of the extra-long staple fibres creates cotton fabrics of superior level with a dense structure, silky smooth touch and shiny look.

SONATA is percale woven with a 665 thread count and combines its softness with an irresistible crispness.

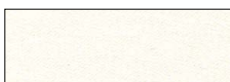

SINFONIA is satin woven with a 750 thread count and offers an ultra-soft feel with a glossy finish.

Voorwassen

Alvorens u voor het eerst in ons bedlinnen slaapt, is het belangrijk de artikelen te wassen. Dit geldt eveneens voor het badlinnen. Door een behandeling die noodzakelijk is om de stof een zacht gevoel te geven, ligt er een laagje op die ervoor zorgt dat de stof niet kan ademen. Door het wassen verdwijnt dit laagje volledig en kunt u ten volle genieten van de unieke eigenschappen van onze stoffen. Daarnaast wordt door het wassen de krimp verwijderd uit de stof en zullen de artikelen perfect passen.

Wassen

Elk artikel is voorzien van een etiket met wasvoorschriften. Het is belangrijk na het wassen de artikelen zo snel mogelijk uit de machine te halen. Kies bij drogen in de droogkast een kort programma zodat de artikelen niet volledig droog zijn. Daarna kunt u ze nog even ophangen om verder te drogen, zo gaat de stof minder kreuen en blijft langer mooi. Door de hoge warmte en beweging in de droogtrommel worden de katoenvezels afgebroken, wat de duurzaamheid van de stof vermindert. Gebruik een kwalitatief wasmiddel, zonder optisch bleekmiddel en zeker zonder chloor. Wij raden het gebruik van vloeibaar wasmiddel aan om vlekken te voorkomen. Als het water kalkrijk is, raden we het gebruik van een anti-kalkmiddel aan, vooral voor donkere kleuren. Gebruik van een wasverzachter wordt afgeraden.

Vlekken

Het belangrijkste in geval van vlekken, is deze zo snel mogelijk te verwijderen. Hoe langer de vlek in de stof zit, hoe moeilijker te verwijderen. De vlekken moeten verwijderd worden met koud water. De artikelen pas wassen wanneer de vlek verwijderd is, zeker bij bloedvlekken. Indien men een bevlekt artikel met warm water wast en/of strijkt, wordt de vlek gefixeerd en kan deze niet meer worden verwijderd.

Strijken

Het artikel best lichtjes vochtig strijken, zeker voor 100% linnen stoffen. Om het perfect resultaat te bekomen, kunt u na het opmaken van uw bed, het linnen wat vochtig maken met een plantenspuit (met proper water!). Wanneer de stof opdroogt, heeft u perfect glad bedlinnen.

Prélavage

Avant de dormir dans votre linge de lit pour la première fois, il est nécessaire de le laver. Ceci vaut aussi pour le linge de bain. En effet, le traitement nécessaire pour donner le touché typique au tissu ne permet pas aux fils de respirer et ne donnent pas un sentiment confortable. En lavant le tissu vous pourrez profiter de suite au maximum des caractéristiques uniques du tissu, de plus le retrait sera parti.

Lavage

Sur chaque article, il y a une étiquette pour le nettoyage. Il est important d'enlever les articles de la machine à laver, dès que le programme est terminé. En utilisant le sèche-linge il faut prendre un programme court pour que les articles soient encore un peu humides. Le tissu sera moins froissé et plus facile à repasser. Ne pas mettre le sèche-linge sur une température trop élevée et trop forte, les fibres de coton peuvent être abimées par la chaleur et le mouvement intense. Utiliser de préférence une lessive de bonne qualité sans eau de javel et sans chlore. Une lessive liquide est recommandée. Si l'eau est riche en calcaire, employer un produit anticalcaire, particulièrement pour les couleurs foncées. L'usage d'assouplissant est déconseillé.

Tâches

Traiter les tâches le plus vite possible afin qu'elles n'aient pas le temps de se fixer. Utiliser de l'eau froide pour enlever les tâches. La chaleur va fixer les tâches, et il ne sera alors plus possible de les traiter. Il est donc important d'enlever les tâches avant le lavage et/ou le repassage.

Repassage

Le meilleur résultat sera obtenu en repassant le tissu quand il est encore humide, surtout pour les tissus en lin.

Pre-wash

Before sleeping in your new bed linen, it is important to wash it. This also applies to bath linens. Because the fabric has been treated to increase its softness, there will still be a thin coat of this product on the fabric that does not allow the cotton to breathe. This layer is completely dissolved through washing. Not only will washing allow the fabric to breathe, but it will also shrink your linen to size, creating a perfect fit and maximum pleasure.

Laundering

All of our pieces come with a care instruction label. Please follow the shown instructions for the best results. It is also important to remove your bed linen from the washing machine as soon as the wash cycle is done. For drying, use a short program so that the items are not completely dried. The next step is to hang the linen to dry. This ensures fewer wrinkles and increases the longevity of your bed linen. Note that high heat and tumbling in a dryer breaks cotton fibers down and, over time, reduces the durability of the fabric. Finally, we recommend that you avoid fabric softeners, whiteners, and bleach, and use only high-quality laundry detergent. Liquid detergent works best for avoiding stains. If you have hard water in your area, adding a gentle descaling agent will produce better results for darker colors.

Stains

Stains must be removed as quickly as possible. The longer a stain remains in the fabric, the more difficult it is to remove it. Use cold water to work the stain out of the fabric and only launder your linens once the stain is gone, particularly with blood stains, as washing a stained item in warm water will fix the stain to the fabric. Ironing a stain after washing will make the stain nearly impossible to remove.

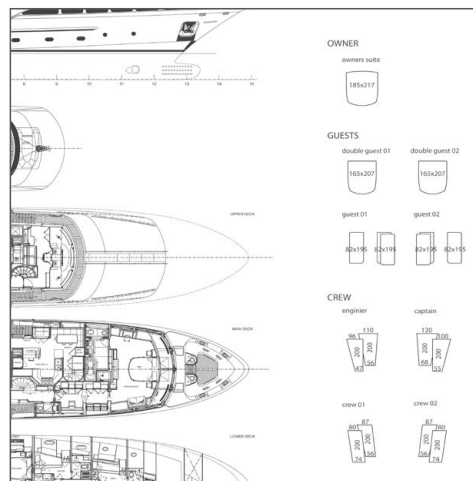

Ironing

Ironing the fabric while it is still slightly damp produces the best results. This is definitely so with 100% linen fabrics. For the perfect result, after making your bed, use a spray bottle, filled with clean water, to mist the top sheets and pillowcases. Once the fabric is dry, your bed will be perfectly smooth.

Wat zijn de typische eigenschappen van de verschillende stofkwaliteiten? Quelles sont les caractéristiques propres à chaque tissu? What is the difference between the different fabric qualities?
